

Identifying Carbonyl compounds

Pre-lesson assignment – Textbook page 460-462

Make notes on Identifying Carbonyl Compounds.

Use the following questions as guidance

1. State the reagents used to test for the presence of carbonyl compounds, and the result of the test.
2. Write a brief method for this test
3. State the reagents used to positively identify an aldehyde, and the result of this test.
4. Write a brief method for this test.
