

Redox reactions- Continued

Pre-lesson assignment – Textbook p. 372-375

Make notes on redox reactions

1. Explain how an equation for a redox reaction can be determined by oxidation numbers. Use worked example on p374 as a guide. Summary questions 3 and 5 can be used for practice.
2. Explain how a half equation can be constructed for a reduction or an oxidation. Use the worked example on p.375 as a guide. Summary question 4 can be used for practice.
