

Y12 – Introduction to Organic Chemistry Checklist

Stick this checklist into your yellow book at the beginning of the topic. Tick off the topics as you cover them.		
In this module you are expected to be able to...	In Notes	Revised
<ul style="list-style-type: none"> Define the terms <ul style="list-style-type: none"> Homologous series Functional group Molecular formula General formula Structural formula Displayed formula Skeletal formula Alicyclic Aliphatic Aromatic 		
<ul style="list-style-type: none"> Describe the alkanes as a homologous series including a description of their bonding and the general formula. 		
<ul style="list-style-type: none"> Name unbranched alkanes C₁ to C₁₀ and cycloalkanes. 		
<ul style="list-style-type: none"> Name branched alkanes and cycloalkanes 		
<ul style="list-style-type: none"> Draw molecules in, and convert them between, skeletal, structural and display formulae. 		
<ul style="list-style-type: none"> Identify a range of functional groups (see information sheet) and name molecules containing them 		

Pre-test Evaluation

I have...	
Updated my yellow book notes	
Ensured I understand all of my notes	
Looked on the open drive for additional work	
Asked my teacher for guidance	
Confidence rating	I'm doomed! -- - = + ++ I am the BOSS!
